B - FIA CHAMPIONSHIPS ACCREDITATION ROADMAP

FOREWORD

FIA takes its responsibility in leading motor sport and mobility into a low carbon future to reduce the environmental impacts of our activities and contribute to a greener planet. I'm glad that our Members Clubs approve our environmental strategy that is part of the Purpose Driven initiative focused on the societal contribution of our two pillars. By developing fuel made from bio waste that can power Formula 1, we are taking a new step forward. With the support of the world's leading energy companies, we can combine the best technological and environmental performance.

A handwritten signature in black ink, appearing to read 'J. Todt'.

Jean Todt
FIA President

The Environmental Strategy approved during the General Assembly week is key in consolidating FIA's commitment to a low-carbon future. It will not only engage in a wide organisational effort to measure, reduce, offset and remove the emissions that result from its own activities -becoming carbon neutral from 2021 and net zero by 2030-, FIA will also take a leadership role, among other sports federations, in pushing for global climate action. This new strategy provides a whole framework to support its members in becoming more sustainable and build climate leadership themselves.

A handwritten signature in black ink, appearing to read 'Felipe Calderon'.

Felipe Calderon
President of the FIA Environment
& Sustainability Commission

INTRODUCTION: AMBITION & LEGACY

/ OUR AMBITION

Reaching carbon neutrality in 2021, in the transition towards a state of net-zero emissions in 2030.

2021 FIA to reach carbon neutrality

2030 FIA to reach net-zero status

CARBON NEUTRALITY

Reducing carbon emissions and purchasing **carbon credits** for an amount equal to the remaining emissions.

NET ZERO

Reducing carbon emissions in alignment with the targets outlined in the **Paris Agreement** and **removing** from the atmosphere those that cannot be eliminated.

INTRODUCTION: AMBITION & LEGACY

/ OUR LEGACY

A Climate-neutral organisation
with a science-based action plan

A credible organisation with
demonstrated achievements

A Net-zero organisation leading
the climate fight through sustainable
practices, innovations & technology

2021 HORIZON

2025 HORIZON

2030 HORIZON

Empowered members and
championships given the right tools
to develop their own action plan

Qualified members and
championships with developed
expertise in sustainability

Leading members & championship
reaching their own vision of
sustainability

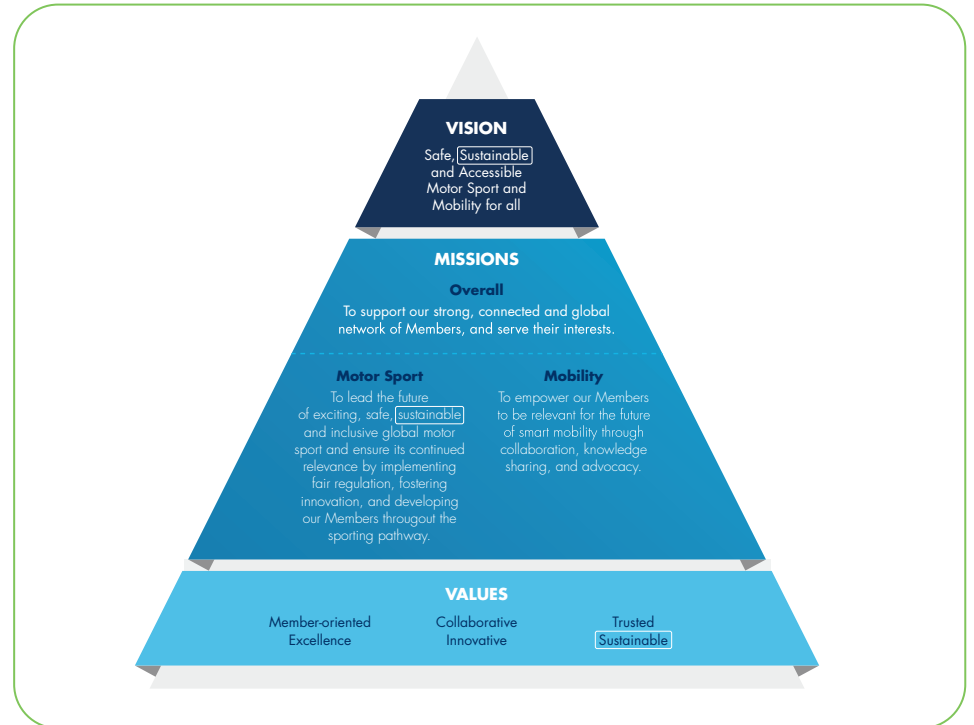

CONTEXT

/ FIA VISION, MISSIONS & VALUES

The Fédération Internationale de l'Automobile (FIA) is a global organisation that promotes a **Safe, Sustainable & Accessible Motorsport and Mobility for all**.

While sustainability is **embedded in our vision, mission & values**, there is a need for a **common voice and direction for both sport & mobility** that will ensure our **continued relevance and leadership in the future**.

The **FIA Environment & Sustainability Commission** has been developing an Environmental Strategy for 2020-2030.

CONTEXT

/ FIA AND THE GLOBAL SUSTAINABILITY AGENDA

The FIA Environmental Strategy for 2020-2030 is embedded in the global environmental and sustainability agenda.

/ UN SUSTAINABLE DEVELOPMENT GOALS

The UN's 2030 Agenda for Sustainable Development is comprised of 17 Sustainable Development Goals for 2030. These goals provide a common framework for organisations to explain how they plan to contribute to sustainable development. The Commission has selected eight SDGs that are most applicable to FIA activities linked to the Environment, and where the strategy will have a positive contribution:

- > protecting **water-related ecosystems** (6)
- > promoting **clean energy** technology (7)
- > advocating access to **sustainable transport** (11)
- > promoting efficient use of **natural resources** (12.2)
- > reducing **waste** generation (12.5)
- > taking urgent action to combat **climate change** (13.3)
- > reducing **marine pollution** (14.1)
- > reducing the degradation of **natural habitat** (15.5)
- > enhancing **global partnership for sustainable development** (17.6)

CONTEXT

/ FIA AND THE GLOBAL SUSTAINABILITY AGENDA

The FIA Environmental Strategy for 2020-2030 is embedded in the global environmental and sustainability agenda.

/ UNFCCC SPORTS FOR CLIMATE ACTION FRAMEWORK

The UNFCCC Sports for Climate Action Framework was launched during COP24 to gather sports organizations, teams, athletes, and fans in a concerted effort to raise awareness and action to meet the goals of the Paris Agreement.

FIA became signatory of the framework in December 2019. Signatories commit to adhere to a set of five principles and incorporate them into strategies, thus setting the stage for a wider dissemination of the message and long-term success.

United Nations
Climate Change

CONTEXT

/ FIA AND THE GLOBAL SUSTAINABILITY AGENDA

The FIA Environmental Strategy for 2020-2030 is embedded in the global environmental and sustainability agenda.

/ INTERNATIONAL OLYMPIC COMMITTEE

The IOC is the leader of the Olympic Movement, guiding its stakeholders in developing sustainable sport and promoting sustainability through sport. Sustainability is one of the three key pillars of Olympic Agenda

2020, and the IOC strongly encourages International Sports Federations and National Olympic Committees to develop sustainability action plans.

The FIA is an IOC-recognised International Sport Federation since 2011. The FIA Environmental Strategy supports the IOC objectives and will contribute to build a better, more sustainable world through sport.

STRATEGY SUMMARY

FIA ENVIRONMENTAL STRATEGY 2020-2030

VISION

Sustainable motor sport and mobility for all

MISSIONS

Develop and improve
environmental sustainability
across motor sport
and mobility

Guide FIA members and
championships towards
competitive and sustainable
practices and activities

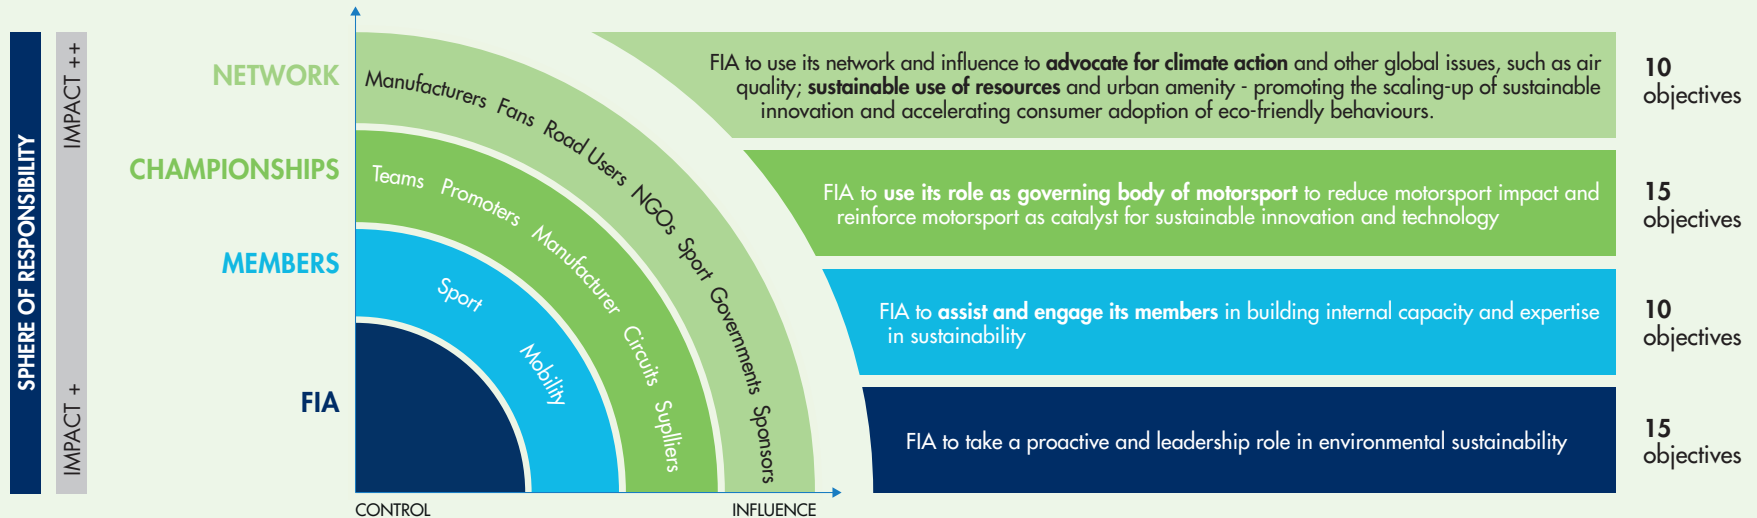

Promote sustainable motorsport
and mobility to **contribute**
to global targets of the
environmental agendas

STRATEGY SUMMARY

/ OUR FOUR SPHERES OF RESPONSIBILITY

The FIA has set itself 50 objectives across its four spheres of responsibility.

STRATEGY SUMMARY

/ OUR THREE STRATEGIC GOALS

The FIA Environmental Strategy for 2020-2030 focused on three strategic goals

CLIMATE ACTION

Accelerate net zero transformation

Climate change is one of the greatest challenges we face as a society and global organisations can display climate leadership by engaging together in the climate journey.

By becoming signatory of the *UNFCCC Sports for Climate Action*, the FIA has reinforced its commitment of contributing to the path of low carbon economy that global leaders have agreed in Paris and to the clear trajectory that the global sport community is jointly developing to combat climate change.

The FIA will take responsibility for its climate footprint and work with its members and championships to support their efforts in making a net zero and sustainable future a reality for all. FIA will leverage its network and influence to advocate for Climate action and other global issues, such as air quality.

STRATEGY SUMMARY

/ OUR THREE STRATEGIC GOALS

The FIA Environmental Strategy for 2020-2030 focused on three strategic goals

2 TECHNOLOGY & INNOVATION

Foster sustainable & innovative solutions

To tackle today's global challenges, radical innovation and transformation is needed in every sector of the global economy and all parts of the world.

Historically, the motorsport industry has been regarded as the pinnacle of technology as motor racing teams, suppliers, automotive manufacturers have invested in radical and disruptive innovation in their quest for a competitive advantage.

The FIA believes that motorsport will be an important vehicle to raise awareness on the potential of disruptive technology and will continue showcasing sustainable and innovative solutions and enhancing cooperation towards a sustainable future.

STRATEGY SUMMARY

/ OUR THREE STRATEGIC GOALS

The FIA Environmental Strategy for 2020-2030 focused on three strategic goals

3 SUSTAINABLE PRACTICES

Drive sustainable change

Environmental protection and natural resource efficiency are among the top priorities in today's world, as concerns rise on biodiversity degradation, resource scarcity and environmental risks.

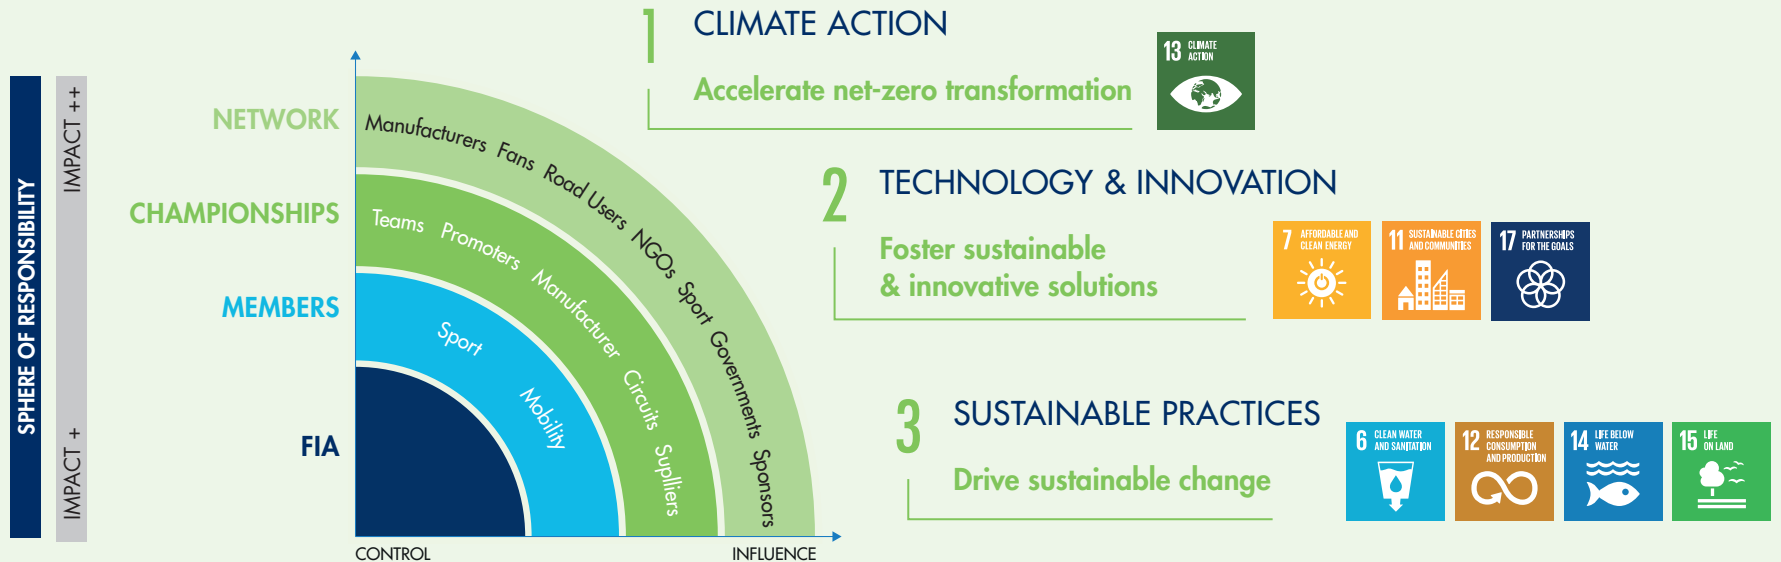

The FIA acknowledges that its activities and events have an impact on the environment and will work with its stakeholders to minimize those impacts and inspire positive behaviors.

The FIA will also support its members in building expertise in sustainability and provide them with the tools for advocacy purposes in sustainable mobility.

STRATEGY SUMMARY

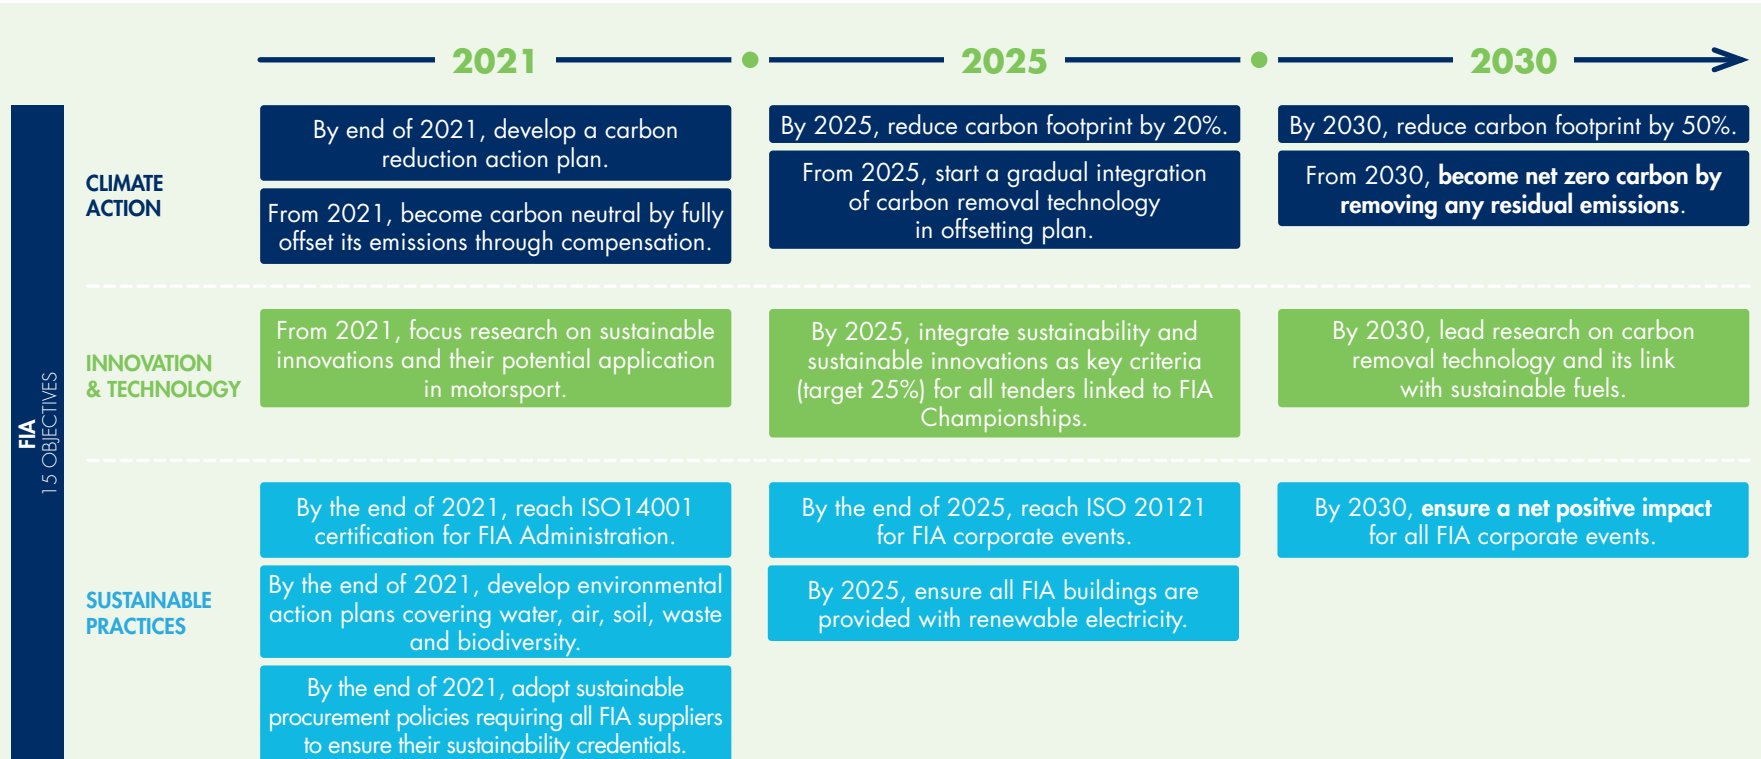

/ FIA ENVIRONMENTAL STRATEGY - SUMMARY

3 STRATEGIC GOALS

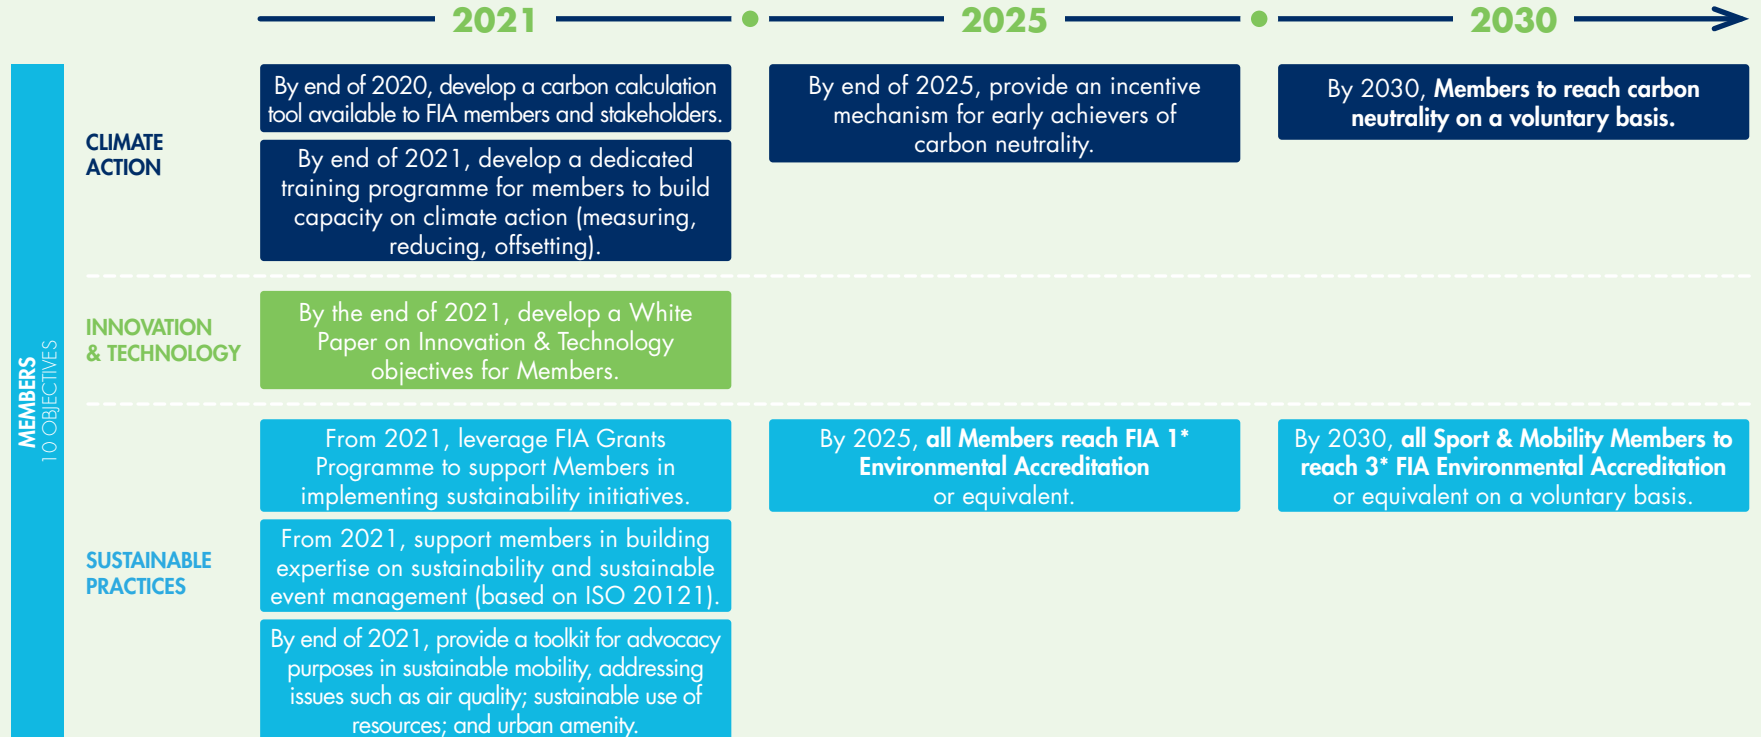

STRATEGY ROADMAP

FIA to take a proactive and leadership role in environmental sustainability

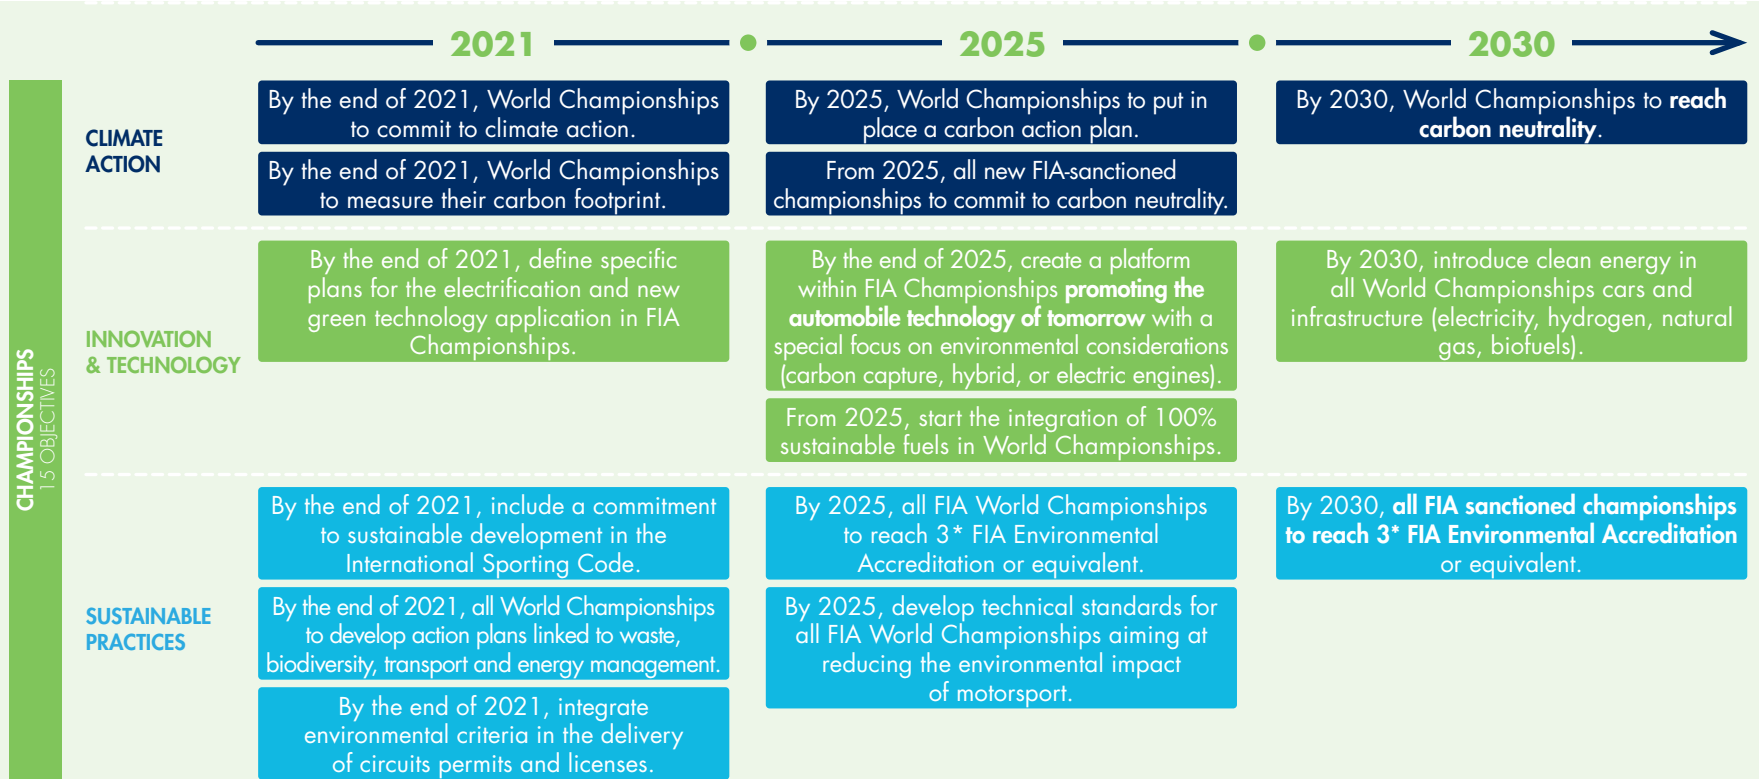

STRATEGY ROADMAP

FIA to assist and engage its members in building internal capacity and expertise in sustainability

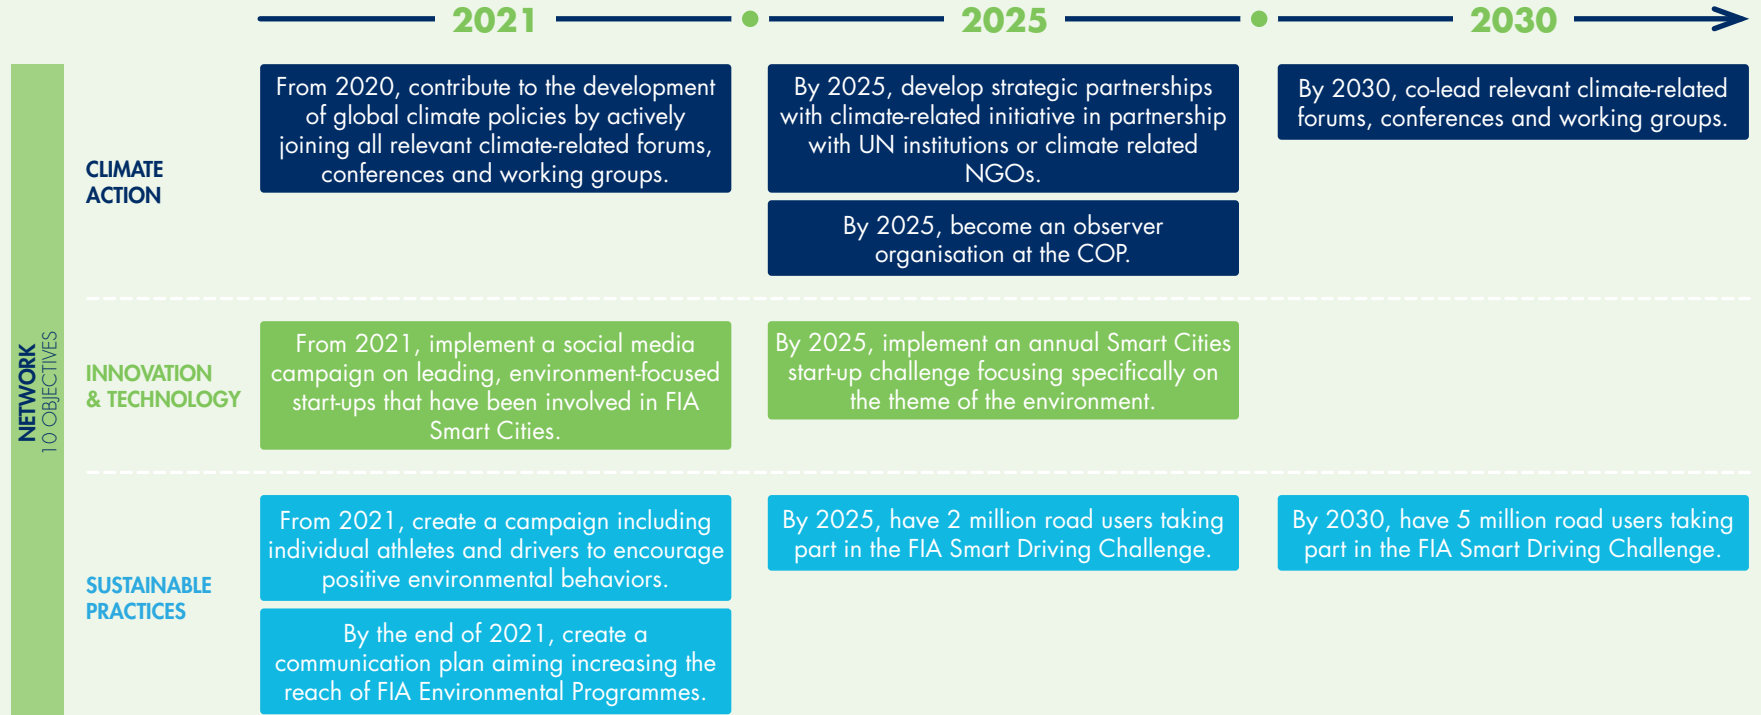

STRATEGY ROADMAP

FIA to use its role as governing body of motorsport to reduce motorsport impact and reinforce motorsport as catalyst for sustainable innovation and technology

STRATEGY ROADMAP

FIA to use its network and influence to advocate for climate action and other global issues, such as air quality; sustainable use of resources and urban amenity
- promoting the scaling-up of sustainable innovation and accelerating consumer adoption of eco-friendly behaviours

APPENDIX A: FIA Net Zero Plan

/ FIA NET ZERO STRATEGY

FIA ADMINISTRATION CARBON FOOTPRINT (2019)

Other activities (9%)

Includes electricity, energy, purchased goods, capital goods, waste and employee commuting.

FIA Freight Transports (22%)

Includes freight to championships, (ground and air freight) and events (ground and sea freight).

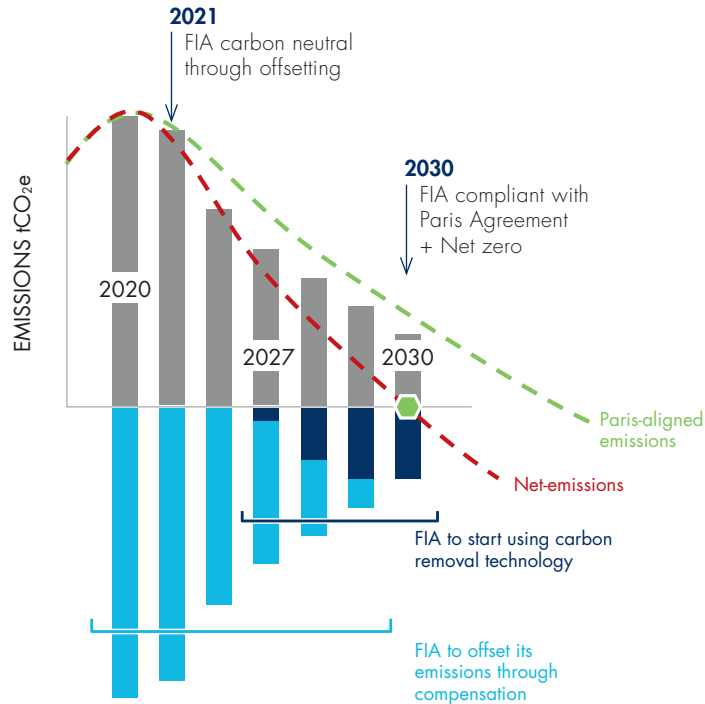

2019 FIA Carbon Footprint
= 18'500 t CO₂e

FIA Business Travels (69%)

Includes FIA Staff travel to events and championships (travel and accommodation).

APPENDIX A: FIA Net Zero Plan

/ FIA ADMINISTRATION CARBON PLAN

In order to comply with the Paris Agreement and to become net zero:

- 2021** Put in place a carbon reduction plan aiming at reducing by 20% in 2025 and 50% in 2030, when compared to baseline year (2019)
- 2021** Start offsetting emissions via compensation, in selected projects
- 2027** Start investing in carbon removal technology and potential synergies with Sustainable Fuels

By 2030, reach net zero carbon status

APPENDIX B: FIA Championships Accreditation Roadmap

FIA ENVIRONMENTAL ACCREDITATION - WORLD CHAMPIONSHIPS ROADMAP
